PROJECTS

WEATHER APP USING CLOUD API

Created a simple web application that fetches and displays real-time weather data for any city using a cloud-based API. The app makes HTTP requests to a cloud service and shows temperature, humidity, and weather conditions.

PERSONAL PORTFOLIO SITE

Created a personal website to display my skills and projects using HTML, Tailwind CSS, and JavaScript. The website includes a dark and light theme toggle, smooth animations, and links to my projects. It is fully responsive and deployed on GitHub Pages.
